

DISCORDANDO Music.

"Discordando Music - Installation Manual"

Francisco Cardoso Lima (up201905781)

Miguel Augusto Marombal Araújo (up201905077)

Ricardo Jorge Teixeira Tripeça (up201905749)

Table of Contents

1	Download and Unzip the Application	2
2	Run the Application	2
2.1	Open the Terminal	2
2.2	Change directory to DiscordandoMusic folder	2
3	External Software	5
3.1	JAVA	5
3.2	FEUP's VPN	5

1 Download and Unzip the Application

Zip available in:

- https://gitlab.com/psw_22_231/1meec_a06/a06_3/-/wikis/Installation-Instructions

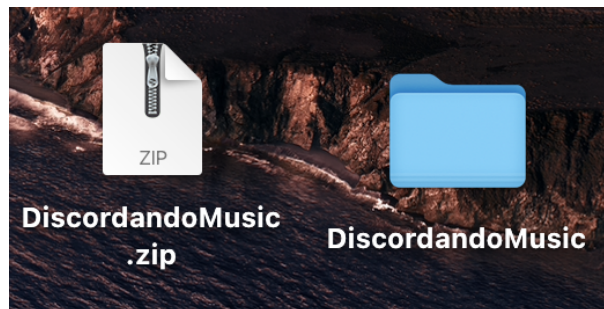

Figura 1: Application's Zip and Folder

2 Run the Application

To run the Application you must do the following steps.

2.1 Open the Terminal

Figura 2: Command Terminal (Mac OS)

2.2 Change directory to DiscordandoMusic folder

To change the directory you should type in the terminal.

cd *PathToFolder*/DiscordandoMusic [1]

In the example presented in figure (3) the DiscordandoMusic folder is in the Desktop directory.

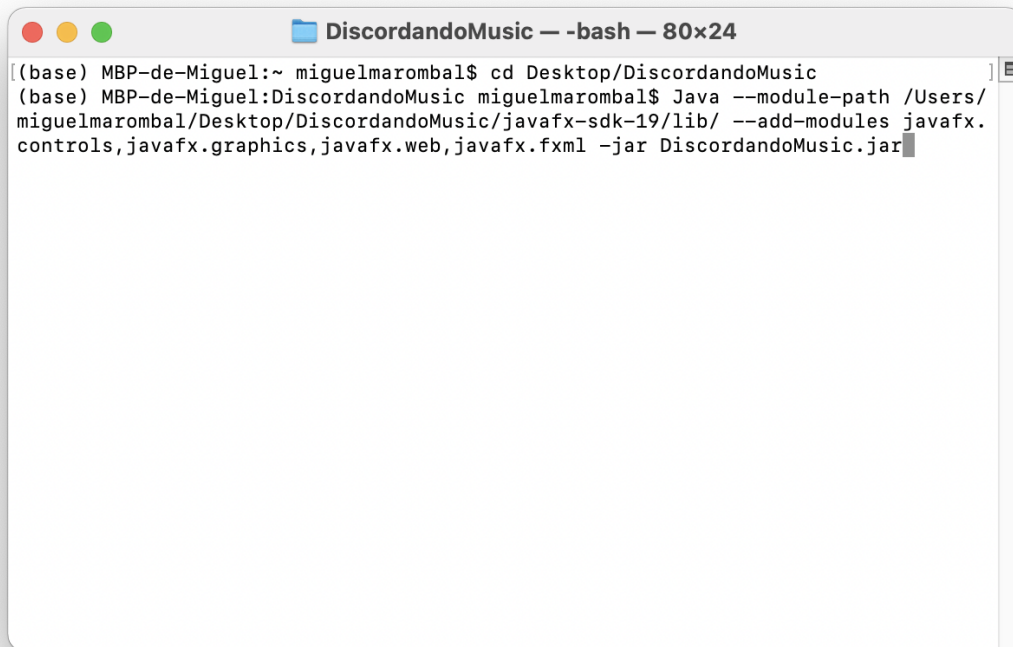

Figura 3: Changing Directory

Then, type the following command

Java -module-path *PathToFolder*/DiscordandoMusic/javafx-sdk-19/lib/ -add-modules javafx.controls, javafx.graphics, javafx.web, javafx.fxml -jar DiscordandoMusic.jar

Once again, *Path to File* should be the path to DiscordandoMusic folder. Figure (4) shows an example. (In the DiscordandoMusic folder is available a text file with the previous terminal command so you can copy it easily).

```
DiscordandoMusic — -bash — 80x24
((base) MBP-de-Miguel:~ miguelmarombal$ cd Desktop/DiscordandoMusic
(base) MBP-de-Miguel:DiscordandoMusic miguelmarombal$ Java --module-path /Users/
miguelmarombal/Desktop/DiscordandoMusic/javafx-sdk-19/lib/ --add-modules javafx.
controls,javafx.graphics,javafx.web,javafx.fxml -jar DiscordandoMusic.jar
```

Figura 4: Launching the Application using Terminal

After executing the previous command Discordando Music will launch properly as expected.

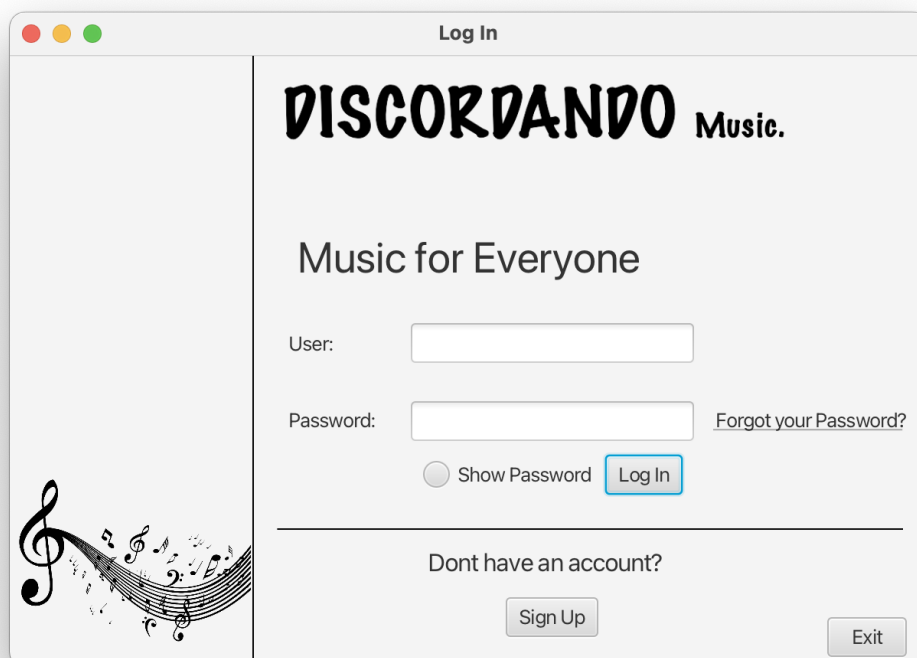

Figura 5: Discordando Music

3 External Software

3.1 JAVA

In order to execute the previous terminal command you first need to have Java installed. Installation Guide of JAVA for the most Operating Systems can be accessed in: <https://www.java.com/en/download/>

3.2 FEUP's VPN

In order to Login (and then use the application), you should be on FEUP's Network. If you are not in FEUP's Campus you can use FEUP' VPN. Installation Guide of FEUP's VPN for the most Operating Systems can be accessed in:

<https://www.up.pt/it/pt/servicos/redes-e-conetividade/vpn-eca13b99>
